**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

1. Claims 1-2, 4-7, 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent NO.5378475 to Smith et al, or US Patent NO. 6001386 to Ashton et al. Both Ashton and Smith teach a sustained drug release agent with a drug core, an impermeable and permeable coating layer and a suture tab adhered to and extending

Art Unit: 3763

from the drug delivery device that is used during surgery to adhere said device to the body of a mammalian organism.

2. Claims 1-2, 4-7, 11-14 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent NO.6713081 to Robinson et al or US Patent NO. 6413540 to Yaacobi Or US Patent No. 5902598 to Chen et al.

Chen, Yaccobi and Robinson all teach a sustained drug release agent with a drug core, an impermeable and permeable coating layer and a suture tab adhered to and extending from the drug delivery device that is used during surgery to adhere said device to the body of a mammalian organism.

### ***Response to Arguments***

3. Applicant's arguments filed 11/29/2004 have been fully considered but they are not persuasive.

a. Applicant alleges Smith does not teach an impermeable polymer coating that is adjacent the drug core, or a permeable polymer coating with a suture tab that is made of the same material as the permeable polymer coating, which are cured at the same time. However Smith does teach all of the above limitations. The definition of adjacent is Close to or lying near, and Smith does teach an impermeable layer 10 lying near or close to the drug core 5. Furthermore Smith's permeable member is made out of PVA, which is the same polymer material as the suture tab. (Col.8, line 45-65).

Art Unit: 3763

b. In regards to the curing process argument MPEP 2112.02 states: "[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985)

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
